

ECM Ltd (Energy Management) www.ecm-uk.com

"A & N have been helping us with our IT since the mid nineties. Over the years they have supplied us with; networking, servers, PC's, broadband products, printers & software. As our business has grown, A & N have always managed to help us implement the right IT.

In addition to providing next day cover on all our on-site equipment, A & N manage our network from their helpdesk ensuring that our antivirus is up-to-date, checking our backups & managing our Windows updates.

More recently we have needed home-working. Taking work home on laptops & disks was becoming difficult - we needed a much better solution. A & N devised & implemented a "proper" home-working solution for us. Our home-workers can now "remote desktop" to their office PC's & work as if they were sat in the office. This is done entirely securely using broadband/internet technologies."

Steve Casson, Managing Director, ECM Ltd
